Game Animator & VFX Artist Case Study

This case study evaluates artistic and technical skills in Unity through two tasks. The first focuses on 2D animation and particle systems, while the second emphasizes shader effects and VFX.

1) Polygon Arena - Unity 2D Animation Package & Particle System Study

Create an animated splash screen using Unity's 2D Animation Package and Particle System, following the provided assets and references.

Requirements:

- Use the provided assets and sprites to create a visually engaging splash screen.
- Set up the Unity scene based on the provided reference.
- Rig and animate the character using Unity's 2D Animation Package.
- Add a hologram effect for the ship the character is holding, either through animation or shaders.
- Introduce additional VFX or movement to enhance the scene while maintaining the game's style.
- Ensure smooth animation with subtle yet detailed motion.

Deliverables:

- A 60 FPS screen capture video in .mov format.
- The complete Unity project files.

2) Critical Strike - Shaders & Particle System Study

Create an animated Lucky Draw Opener effect using shaders and Unity's Particle System, following the provided assets and reference video.

Requirements:

- Use the provided sprites and assets to create the Lucky Draw Opener animation.
- The background is a static image; focus only on the VFX for the opener.
- Apply **fire and dissolve shaders**, animating them to achieve the desired effect.
- Follow the reference video closely to match the intended visual style.
- Ensure attention to detail and smooth transitions.

Deliverables:

- A 60 FPS screen capture video in **.mov** format.
- The complete Unity project files.

Submission Guidelines:

- You will be evaluated based on the guidelines and requirements outlined above.
- Submit your Unity project via **GitHub** as a public repository.
- The deadline for submission is **7 days** from the date of assignment.
- If any unexpected issues arise, please inform us as soon as possible.
- Feel free to contact us if you have any questions about the tasks.
